

Final Project Part 3 List of Files Submitted

1. `__init__.py` - initialize connection to database and creates flask app
2. `auth.py` - generates page(s) to handle user registration, login, and logout for customers, agents, and airline staff
3. `main.py` - this is the backbone of the web application; generates all other pages and use cases in the app
 - a. Includes home pages for all three user types, flight search, viewing personal account details, etc.
4. `forms.py` - contain forms used for airline staff in adding a new plane, adding a new airport, changing flight status, and adding a new flight
5. `models.py` - contains SQLAlchemy models of database tables
6. `templates` - a folder containing all the html templates for web pages
